

## When it comes to hard surface performance, NeoFloor™ is hard to beat.

That's because NeoFloor™ is a whole different animal. NeoFloor™ is a remarkable “hybrid” floor covering from Lees that gives you all the combined advantages of carpet and vinyl. Like carpet, NeoFloor™ is warm and cozy. It's beautiful to look at, safe and comfortable to walk on, and easy to design with. Like vinyl, NeoFloor™ has exceptional durability. It's easy to clean, so it's perfect for areas prone to spills, stains and nasty weather.

All of which make NeoFloor™ the practical and affordable solution for Healthcare, Education, Retail and many other high traffic commercial environments.

It's the best alternative for any area that needs the durability, hygiene and easy clean-up of a hard surface covering, and also requires the sure footing and design flexibility of carpet.

## NeoFloor™ prevents small spills from becoming a big problem.

When it comes to spills, NeoFloor™ is an asset, not a liability. On vinyl, liquids are accidents waiting to happen. But a spill on NeoFloor™ stays

contained within the fibers, with almost no loss of slip-resistance. And cleanup is complete in just minutes. NeoFloor™ is ideal for cafeterias, dining rooms, patient rooms, hospital hallways, examining rooms, and entrances and exits.
