

Unibond RE reduces environmental impacts throughout the entire product life cycle. Through a multitude of advancements in materials sourcing, manufacturing processes, product performance and the use of recyclable materials, Lees continues to fulfill the promise of sustainability. Today, 100% of Lees Unibond RE and Unibond® carpets are certified Environmentally Preferred Products.

TO PRESERVE AND PROTECT THE ENVIRONMENT – UNIBOND RE™

- Contains a minimum 20% post-consumer recycled content by total product weight*
- Meets USGBC LEED criteria for recycled content
- Meets USGBC LEED – CI (Commercial Interiors) for Indoor Environmental Quality Credit 4: Passes CRI Green Label Plus
- Passes the VOC limits of South Coast Air Quality Management District Rule #1168
- Uses no water in the manufacturing process
- Complies with the most rigorous manufacturing air quality standard – Class I

Additionally, by incorporating a rapidly renewable bio-based resource, Unibond RE reduces our dependency on petrochemicals by 10 million pounds each year.

The superior performance and durability of Unibond RE contributes to environmental sustainability by keeping carpet in service longer – and out of the waste stream.

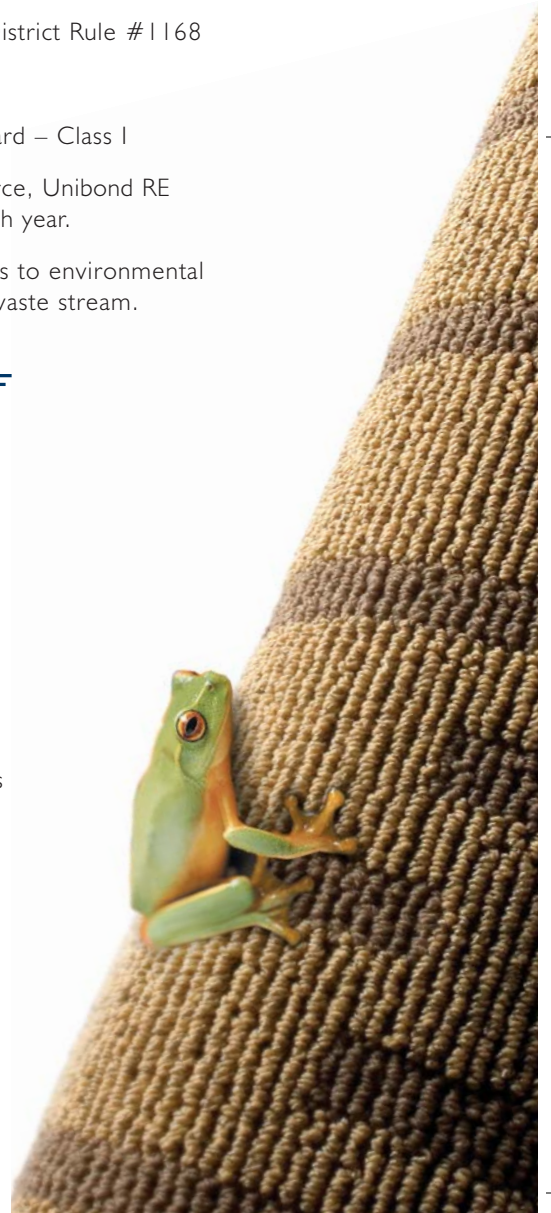

TO PROVIDE THE HIGHEST LEVEL OF PERFORMANCE – UNIBOND RE™

- Eliminates edge ravel
- Maintains tuft bind, wet or dry
- Protects against delamination
- Impervious to moisture
- Doesn't promote the growth of mold or mildew

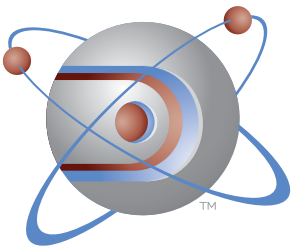

It's rare when a product's performance directly enhances its environmental sustainability qualities, but Unibond RE accomplishes this feat quite nicely. And Unibond RE comes with a lifetime, non-prorated warranty—an impressive display of the confidence Lees has in this product's performance capabilities.

* Certified by Scientific Certification Systems.

DURACOLOR®

THE MOLECULAR CODE FOR STAIN RESISTANCE.

Lees' commitment to environmental sustainability goes far beyond responsible use of resources and improved manufacturing processes. Our exclusive Duracolor patented permanent stain resistance system reduces the environmental impact of Lees carpets throughout the product life cycle.

OFFERING THE UTMOST PERFORMANCE AND ENVIRONMENTAL CAPABILITIES – DURACOLOR®

- Duracolor – the patented, permanent stain resistance system for carpet
- Will not wash or wear away
- Protects indoor air quality
- Eliminates the need for harsh VOC emitting detergents
- Reduces the impact to the downstream waste water treatment facility – no harsh chemicals are released into the waste water during maintenance
- Resists 96% of common workplace stains
- Contributes to the USGBC LEED – EB (Existing Buildings) rating system under Indoor Environmental Quality Credit 5: Green Housekeeping Credit
- Requires less frequent cleaning
- When Unibond RE™ is combined with Duracolor and Antron® Legacy nylon, an Environmentally Preferable Product by Invista, performance and sustainability are perfectly matched
